

UREĐAJ: SpeedVac koncentrator

DEVICE: SpeedVac concentrator

PROIZVODAC I MODEL / MANUFACTURER AND TYPE: Savant™ SPD131DDA SpeedVac™ Concentrator, ThermoFisher Scientific

GODINA PROIZVODNJE / PRODUCTION YEAR: 2007

Kratki opis uređaja

SpeedVac koncentrator za uparavanje unutar kućišta uređaja ima postolje za epruvete. Moguće je na uređaju podesiti vrijeme trajanja uparavanja, ali i intezitet zagrijavanja.

Short description of the device

The SpeedVac is an instrument for evaporation which inside the case of the device has a base for the tubes. It is possible to set the duration time, as well as the heating intensity.

Namjena

SpeedVac koncentrator služi za uparavanje jakih kiselina, baza i agresivnih organskih otapala.

Purpose

SpeedVac concentrator is an instrument for evaporating strong acids, bases and aggressive organic solvents.

Tehničke značajke

SpeedVac concentrator has a base for 12 tubes. Drying rate can be set on high, medium or low.

Technical characteristics

U SpeedVac koncentratoru se istovremeno može uparavati 12 uzoraka. Intezitet zagrijavanja može biti postavljen na visok, srednje visok i nizak.

Tip i priprava uzorka

Uzorci koji se mogu upariti.

Sample type and preparation

Samples that can be evaporated.
