Dear Madam or Sir,

As the academic supervisor of Katarina Filipan, I would like to kindly request an extension of her internship by three weeks, from June 1 to June 21, 2025. This extension would allow her to continue and expand her scientific research in collaboration with supervisors both in Croatia and Poland.

During this extended period, she plans to carry out additional analyses on oil samples using various analytical methods. These results will significantly contribute to a scientific article planned for publication next year. Moreover, she has been invited to participate in a new research project, which offers an interesting comparison with olive oil and represents an important opportunity for her academic and professional development.

The student has already submitted the extension request in her CEEPUS account, but we would appreciate clarification on whether any further documentation is required from our side.

Thank you for considering this request.

Sincerely yours
Supervisor: dr hab. Joanna Bryś,
